

YOUSSEF SABER SALAMA AWAD

Cloud & DevOps Engineer | AWS Engineer | Cloud Security Engineer |

Qalyubia, Egypt | +20 120 658 3435 | youssefsaber592@gmail.com | linkedin.com/in/youssef-saber | github.com/youssefsaber592-netizen

PROFESSIONAL SUMMARY

Computer Science student and AWS-focused Cloud & DevOps Engineer with hands-on experience across cloud architecture, IAM security, Linux administration, and CI/CD pipelines. Selected for the Digital Egypt Pioneers Initiative (DEPI) AWS Cloud Architecting track and certified in DevOps Foundations. Built a 3-tier, cloud-integrated ERP system and completed applied AWS IAM and cloud-security labs, applying least-privilege and role-based access control principles. Combines networking fundamentals (CCNA-trained) with software engineering practice to design secure, scalable, automation-driven infrastructure.

TECHNICAL SKILLS

Cloud & Security	AWS (IAM, Cloud Security, Architecture Fundamentals), Firebase Cloud Firestore, TryHackMe Cloud Security Labs, Least-Privilege & RBAC design
DevOps & Infra	CI/CD pipeline concepts, Linux systems administration, Git/GitHub, DevOps fundamentals, infrastructure hardening
Networking	CCNA concepts — TCP/IP, routing, switching, subnetting; network security fundamentals
Programming	Python, Bash, Java, C++, SQL, HTML/CSS
Core CS	Object-Oriented Programming, Data Structures, Software Engineering Principles, 3-Tier Architecture

KEY PROJECTS

ElectricalStoreERP — 3-Tier Cloud-Integrated ERP System — *Independent Project*

- Architected and developed a 3-tier enterprise ERP application in Java, applying core software engineering design principles.
- Integrated Firebase Cloud Firestore for real-time inventory synchronization and secure NoSQL data access.
- Enforced strict separation between presentation, business logic, and data-access layers to maximize modularity, maintainability, and scalability.

AWS & Cloud Security Hands-On Labs — *TryHackMe*

- Implemented AWS IAM policies applying least-privilege access and role-based access control (RBAC) across simulated environments.
- Ran simulated security audits and access-control reviews, and hardened infrastructure configurations against common misconfigurations.

CERTIFICATIONS & TRAINING

- Digital Egypt Pioneers Initiative (DEPI) Scholar — AWS Academy Cloud Architecting Track, Ministry of Communications and Information Technology (MCIT)
- CCNA (Cisco Certified Network Associate) Training — IT Gates Academy
- DevOps Foundation Certificate — Sprints / Udemy
- Cisco Cybersecurity Essentials — Cisco Networking Academy
- ALX AI Career Essentials — ALX Africa

LEADERSHIP & VOLUNTEER EXPERIENCE

ICT Team Member — *Enactus, Modern Academy*

- Delivered technical and IT infrastructure support for team initiatives, digital presentation systems, and organizational operations.

Event Operations & Logistics Volunteer — *Modern Academy Community / Cairo International Book Fair*

- Coordinated audience management, technical setup, and logistics execution for large-scale university and national events.

EDUCATION

Bachelor of Science in Computer Science — *Modern Academy for Computer Science & Management Technology*

- Relevant coursework: Software Engineering, Computer Networks, Operating Systems, Data Structures, Object-Oriented Programming, Database Systems.
